RE: Gene McDaniel

7145 S Ukraine Street

Aurora, CO 80016

Estimate: 7145S Ukraine St

Date: 8/22/2019

Description	Amount
System Removal:	\$ 1,824.00
Labor to remove existing 20 Module PV system in 1 array, from the roof to allow the installation of the new roof surface including all modules, racking, hardware and any conduit/wire that is conflicting with the installation of the new roof surface. Whenever possible, all existing flashings will be saved/reconditioned for re-use. If new flashing assemblies, module clamps and/or mechanical fasteners are required for safe re-install, quantities will be noted and this will constitute a change and will be priced and approved prior to re-installation. (Price based on hrs/labor)	
System Re-Install:	\$ 2,736.00
Labor to re-install 20 Module PV system in 1 array to roof. Whenever possible, all existing flashings will be re-used. All applicable travel time and any minor work related to the PV system that may be required to comply with current code is included. Includes verification of system performance and proper operation of any existing monitoring devices. (Price based on hrs/labor)	
PV System Materials Reconditioning:	\$ 150.00
The PV system components will be cleaned/reconditioned as required/possible to facilitate the re-use of all flashings and mounts at PV system re-install. Includes disposal of any trash or materials not to be re-used.	
New Lags and Flashing Adhesive:	\$ 150.00
New lags, washers, and flashing adhesive will be provided for the install of all existing flashings and mounts for PV system re-install.	
Electrical Connectors:	\$ 40.00
New electrical connectors required for re-wiring and any necessary Multi-Contact (MC) connectors as require for PV system re-install.	
Consumables:	\$ 100.00
All consumables required to facilitate the re-install of the PV system. Includes permanent fall protection anchorage points, conduit flashings, critter guard and critter guard materials.	

Total: \$ 5,000.00

This estimate includes all labor and stated materials for the removal and re-installation of the PV system only. In the event that additional labor or materials are required to address damaged, missing or necessary components, we will assess the scope of work, provide pricing and obtain approval from the home owner/contractor before proceeding with repairs. Note that a fee of \$400 (per panel) to be added for each additional PV panel that requires replacing.
